INDEX

The Alpine Journal

1969-87

Compiled by J.R. Murray

Foreword

This index has been compiled on the same basis as the previous volume. The only illustrations that have been indexed are, in general, those of single mountains or ranges which are likely to be helpful or of interest. Now that there are more articles about the Greater Ranges than the Alps, the Special Districts section in this index has been expanded to include Alpine articles.

I am grateful to Mr W.L. 'Robin' Robinson for his practical help and very useful advice in compiling this index, and to Sheila Harrison for her work on the typescript and for coping with my hand-writing.

The following abbreviations have been used :
