

at any club debate—obstinate debater that he is—he is certain to be opposed to me and nearly as certain to be voted under the table! Two other old friends of my active days sent in moderate cheques. I explained to them—very modestly—what the cost was likely to be, when the one at once multiplied his cheque by 20 and the other by 10, giving good explanations why it was not also by 20.

Such was the *compulsion* that the Club needed. It was only I myself who was *compelled* by such responses and the general answer of the Club to double my own payment. I am not quite sure I liked such compulsion!

*Vette-Ricordi di esplorazioni e nuove ascensione sulle Alpi, nei gruppi del Monte Rosa, del Cervino et del Monte Bianco dal 1896 al 1921.* By G. F. and G. B. Gugliermi and G. Lampugnani. 350 pp. 4°, and 50 full-page plates. Price to subscribers, L. 80, from the C.A.I. Sez. di Varallo (Novara), Italy.

THE authors are known as pre-eminently the great authorities on the Italian faces of Monte Rosa and Mt. Blanc, besides having made the first ascent of the Aig. Verte from the Glacier de Nant Blanc, the first passage of the Col de l'Aig. Verte on the French side of the chain. They are known as very artistic photographers, and the book should be very welcome to lovers of the Alps.

*Akad. Skiclub, Munich, 1925-6.*—This is the 25th anniversary of the foundation of the University Ski Club, and this beautifully got-up pamphlet, edited by Professor Dr. Karl Gruber, is a record of its activities during its existence and a pious remembrance of the sixteen members killed in action. The Club can claim the first ski traverse of the M. Blanc de Courmayeur. The record of expeditions shows that the members work hard in summer as well as winter. The four photogravures are superb. That of the Güssfeldt variation on the way up to the ice-arête of the Brenva is very striking, and will interest particularly M. Jacques Lagarde, the authority on that route and its most recent worshipper.

There can be no doubt of the great activity and enthusiasm of the Munich school of mountaineers, who have proved their enterprise and courage in every part of the Alps.

plates. San Francisco, Col. Hist. Soc., 1925  
In 1542 Juan Rodriguez Cabrillo named the Sierra Nevada. The Sierra  
was first crossed in 1827. In 1833 an expedition under J. R. Walker first  
explored the range; and in 1845 Frémont. Thereafter surveying and  
climbing were continuous by Clarence King, John Muir, and others. A list of  
all first ascents over 14,000 ft. is here given, beginning with Mt. Whitney in  
1883.

- Lord Minto.** By John Buchan. London, Nelson, 1924  
Pp. 18-20:

' During two summer vacations Melgund went to Switzerland, once with his friend Maclean, with whom he made the third ascent of the Schreckhorn; the journal records sleeping out on a ledge of rock in the snow, from which the top was reached in seven and a half hours. They also climbed the Wetterhorn and Monte Rosa, and traversed the Jungfrau with the famous mountaineer, Mr. Horace Walker, and his daughter, leaving Zermatt just before Mr. Whympfer's first ascent of the Matterhorn, when Queensberry's brother was killed. High mountains are with the Elliots an hereditary passion, and as an Eton boy Melgund had begun his mountaineering career by ascending the Breithorn, the peak which his father had, thirty years earlier as an Eton boy, ascended with his father long before there was an inn at Zermatt, or the Alpine Club had been dreamed of. It is significant that the only extracts copied into his early journals are a poem by the Rev. Arthur G. Butler defending the assault on the Matterhorn, when Lord Francis Douglas was killed; . . . and the great speech of Claverhouse to Morton in Old Mortality. . . . His love of the mountains never left him, and his last climbing adventure was in 1900, when he delayed his journey through the Rockies at Glacier in order to ascend Mount Avalanche—to the amazement of the imported Swiss guides, who could not believe that the Governor-General would get out of his train after a prolonged official tour and spend eleven arduous hours climbing a mountain. He wrote in his journal: "Ascended Mount Avalanche: two guides. Started 6.30 A.M., reached the summit 12.30. Left again 1.30 P.M. and arrived Glacier House 4.40. Very hard climb. We came down roped together, and glissading down a severe slope came to grief and finished the glissade on our backs, but no damage done." He had taken the precaution of inscribing his name on a card which was placed inside a bottle and laid in the snow on the summit, on the chance of its coming to light as "the last message of the Governor-General" should anything untoward happen.'

Pp. 38-39, 1877.

' Lovely view of the Alps this morning after leaving Turin made out Monte Rosa and the Lyzkamm distinctly and got a glimpse of the Matterhorn. I love the mountains, and this morning, when I found myself among them before arriving at Turin it gave me an

incredible feeling of excitement. I suppose it is the recollection of the adventures I have had amongst them, and when I look back now I look upon them and the guides as old friends. There is no better man than a good Swiss guide, and Peter Bohren and Melchior Anderegg, and the Lauciers [? Laueners] keep jumping up in my memory.'
